Hiring Manager
Elmer's Manufacturing

Altona, MB

Dear Elmer's Manufacturing Hiring Manager,

I am writing to express my interest in the Electrical Engineering Coop Student position at Elmer's Manufacturing. With a strong background in computer engineering, a proven track record in both software and firmware roles, and a commitment to continuous learning and improvement, I am confident in my ability to contribute effectively to your team.

In my current role as an Embedded Firmware Developer with UBC Solar's design team, I have been developing firmware for the driver dashboard of a solar-powered vehicle in preparation for the Formula Sun Grand Prix in 2027. Through this experience, I have worked in a collaborative team environment using version control systems such as Git while adhering to established coding standards for documentation and testing. This role has honed my skills in system integration and vehicle firmware diagnostics, making me adept at working with cross-functional teams to uphold functional safety standards and optimize performance metrics, skills I am eager to contribute as a Electrical Engineering Coop Student at Elmer's Manufacturing.

Currently, I am pursuing a Bachelor of Applied Science in Computer Engineering at the University of British Columbia. My technical skill set is diverse and robust, including proficiency in multiple programming languages such as C, C++, Python, Java, and JavaScript. I am adept in various development tools and frameworks, including full-stack development environments like React, version control systems like Git, and Linux-based systems. My academic and practical experience has equipped me with a strong foundation, enabling me to effectively tackle complex technical challenges.

I am excited about the opportunity to bring my technical expertise and collaborative spirit to Elmer's Manufacturing. I am available for a 4-month term starting Summer 2026 and welcome the opportunity to discuss how my skills and experiences align with your needs. Please feel free to contact me via email at gregorybian100@gmail.com or by phone at 604-652-7598.

Thank you for your time and consideration. I look forward to the possibility of contributing to your team.

Sincerely,

Gregory Bian
