Hiring Manager
Zaber
605 W Kent Ave N 2
Vancouver, BC V6P 6T7

Dear Zaber Hiring Manager,

I am writing to express my interest in the Firmware Engineer (co-op) position at Zaber. With a strong background in computer engineering, a proven track record in both software and firmware roles, and a commitment to continuous learning and improvement, I am confident in my ability to contribute effectively to your team.

I first learned about Zaber through its sponsorship of my design team, UBC Solar. What immediately stood out to me was Zaber's commitment to quality—not just in the manufacturing of its hardware, but in the care put into making every product intuitive and user friendly. I really enjoyed reading about the software behind Zaber's devices and explored parts of the codebase. Seeing that level of thoughtfulness and integration is something I want to contribute to as a Co-op student.

I have developed a solid foundation in embedded C through my experience as an Embedded Firmware Developer with UBC Solar. In this role, I worked extensively with real-time operating systems, using freeRTOS on an STM32 microcontroller to schedule tasks, allocate memory and prioritize critical operations such as receiving CAN messages and updating the LCD. I gained a strong understanding of CAN communication, interpreting CAN diagrams and applying bit manipulation to filter and process messages for reliable system performance efficiently. I also strengthened my debugging skills through hands-on problem-solving. For example, I investigated and resolved a hard fault that occurred when switching pages in the LCD update task. By analyzing the program counter, stepping through assembly instructions, and using breakpoints in STM32CubeIDE, I traced the issue to an unaligned memory access when writing to the LCD buffer. This experience enhanced my ability to debug complex firmware issues, work independently, and deliver robust embedded solutions.

Currently, I am pursuing a Bachelor of Applied Science in Computer Engineering at the University of British Columbia. I am excited about the opportunity to bring my technical expertise and collaborative spirit to Zaber. I am available for a 4 or 8-month term starting January or May 2026 and welcome the opportunity to discuss how my skills and experiences align with your needs. Please feel free to contact me via email at gregorybian100@gmail.com or by phone at 604-652-7598.

Thank you for your time and consideration. I look forward to the possibility of contributing to your team.

Sincerely,

Gregory Bian
